Why Oasis Spas are Superior

Premium Australian Spa Net Pumps and Equipment

Proven, reliable Spa Net equipment is backed by an Australia wide service network. Features include teflon coated heaters, super quiet pumps and digital controller with "lockout", "sleep" & "powersave" functions and after spa "clean up" cycle (n/a on Classic Special).

Energy Smart Technology for Lower Running Costs

Connected to a smart meter, Spa Net equipment utilises off- peak power to save up to 25% on running costs. Our filtration pumps are up to 35% more efficient than other spas and our 5 Stage "Energy Smart" insulation systems will lock in heat to further add to your savings.

Designed for Your Ultimate Relaxation

Our insulation systems, whisper quiet pumps and anti-vibration pump mounts make our spas super quiet so you can relax in peace. And your aromatherapy system and underwater light will help create the perfect mood.

Super Safe Filtration

Our "Super Safe" filtration system with "Active Skim" filter and safety weir will keep your spa water fresh while ensuring your complete safety.

Less Maintenance - Minimal Chemicals

Our "Puresafe" ozone system with mixing chamber safely and efficiently reduces chemical use. Optional "Micro Filters" with silver ion technology stop bacteria multiplying, increase water quality and don't need regular cleaning. And our "Thermo-wood" cabinets don't need oiling or maintenance like timber cabinets do.

Premium Components

Oasis spas are engineered to meet harsh Australian conditions and are made using the best components from around the world, including American acrylic, Australian equipment and Canadian jets and fittings.

Stronger Spas that are Built to Last

Our "Tough Bond" spa shells are oven cured and super strong. Our ultimate spa cabinet has a triple reinforced treated timber frame with seat supports plus fibreglass "Tough Barrier Base" and "Thermo-wood" cladding making Oasis Australia's strongest spas.

Fully Approved

Oasis spas have full electrical approvals and meet all Australian Standards.

The Ultimate Hydro-Massage Experience

Premium Canadian "Aqua-ssage" hydro-massage jets have no bearings to clog, no clips to break and PVC backs that won't get destroyed by chemicals (like most jets). With adjustable and interchangeable pulse, swirl and deep tissue massage jets and individual air and water massage controls you can create your perfect massage experience.
